Alexander Aragones Silva

Software Engineer | AI Developer & DevOps

Bogotá, Colombia | +57 320 3063817 | aragonantar@gmail.com

Portfolio: publicalex.github.io | GitHub: github.com/publicAlex | Freelancer: freelancer.com.co/u/AlexanderAragon

PROFESSIONAL PROFILE

Software Engineer with over 3 years of experience developing technological solutions and integrating Artificial Intelligence. Specialized in designing AI solutions to automate repetitive DevOps tasks and generating code and scripts via AI models to accelerate development. Expert in configuring and maintaining CI/CD pipelines, and deploying intelligent models and services in Cloud environments. Proven ability to collaborate with dev, ops, and architecture teams to ensure scalability and efficiency, documenting solutions and promoting best practices in applied AI.

PROFESSIONAL EXPERIENCE

Accion Y Mision Cyg Sas

07/2026 - Present

Developer

Technologies: Docker, GitHub Actions, Python, PHP, AI, CI/CD, Linux Servers, Windows Server

* Gather requirements from clients through key questions, defining the expected behavior before designing the software solution.
* Design AI-powered solutions to automate repetitive DevOps and Windows Server administration tasks, such as backups and recurring billing notifications.
* Build data analysis tools for sales, inventory, payroll, P&L and bank reports, among others, to improve the company's internal processes.
* Configure and maintain CI/CD pipelines with GitHub Actions for secure continuous deployment of 5 services hosted on a single server.
* Meet delivery deadlines on projects with tight timelines.

Innobyte Nexus Partners, SL

02/2025 - 05/2026

AI Developer (Backend) & DevOps

Technologies: Docker, Jenkins, GitHub Actions, Digital Ocean, AWS, TypeScript, NestJS, Python, PHP, AI, CI/CD, Linux Servers

* Design solutions integrating AI tools to automate repetitive tasks in DevOps processes and Linux server administration.
* Generate code and scripts using AI models to accelerate Backend development for corporate projects.
* Configure and maintain CI/CD pipelines using Jenkins and GitHub Actions, ensuring dynamic and secure continuous deployments.
* Deploy intelligent services and manage main server architecture in Cloud environments (AWS, Digital Ocean).
* Document architectural solutions and promote operational best practices in deployments.

ArgusTICs

10/2023 - 07/2024

FullStack Dev & Cloud Ops

Technologies: K3s, Rancher, Kubernetes, Docker Compose, Terraform, Prometheus, Grafana, TypeScript, Python, Java, PHP, CI/CD

* Collaborate with development, operations, and architecture teams to ensure scalability and efficiency of multiple web services.
* Deploy models, services, and work environments for continuous deployment using multiple nodes orchestrated with K3s and Rancher.
* Design and configure server infrastructure integrating monitoring tools (Prometheus, Grafana) to improve operational efficiency.
* Integrate highly complex improvements requested by Stakeholders ensuring system performance.

Gobernacion del Huila

02/2023 - 07/2023

Software Engineer

Technologies: SQL, Java, Power BI, Shell Scripts, Linux

* Document solutions and system requirements using information gathering techniques and best practices.
* Design and develop efficient systems adapted to operational and documentary constraints.
* Automate population characterization processes through the development of dedicated software and scripts.

Reference: Claudia Marcela Maya Perdomo (301 7594267)

TECHNICAL SKILLS

AI & Automation:	AI Solutions Development, AI Code Generation, Process Automation, Intelligent Models
Backend & Dev:	Python, Java, PHP, NestJS, NodeJS, TypeScript
Infrastructure & DevOps:	CI/CD Pipelines, Jenkins, GitHub Actions, Linux Servers, Windows Server, Sysadmin
Cloud & Orchestration:	AWS, Digital Ocean, K3s, Rancher, Kubernetes, Docker, Terraform
Monitoring & Data:	Prometheus, Grafana, SQL, NoSQL, GIT, Security

EDUCATION

Universidad Surcolombiana 08/2019 - 07/2025

Software Engineering

Universidad Nacional de Colombia 05/2021 - 12/2021

MinTic Diploma

PERSONAL PROJECTS

AI Chatbots for WhatsApp Cloud 09/2023 - 04/2024

Development of AI solutions: Creation and deployment of AI Chatbots integrated with the official WhatsApp API in Cloud environments.

Multiple Independent Projects (Development & Ops) 09/2024 - Present

Backend project development, server configuration, and integration of automated scripts. Details on Freelancer profile.
